

Ahmed Abbassi

Full-Stack Developer — React / React Native / NestJS

Tunis, Tunisia | +216 23 631 633 | a.abbassipro@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

SUMMARY

Full-stack developer serving as the sole engineer for a 2-person startup, owning end-to-end delivery — architecture, backend, frontend, mobile, and deployment — for a product suite used by 800+ combined active users. Specializes in React / React Native and NestJS / PostgreSQL, with hands-on depth in real-time systems (WebSockets), offline-first data sync, and OAuth integrations (Google, Facebook, Apple).

EXPERIENCE

Full-Stack Developer — Karriery

Tunis, Tunisia | 2023 – Present

- Sole full-stack developer for a 2-person engineering team, owning the entire development lifecycle for the company's web and mobile product suite (currently 800+ combined active users across products).
- Also contribute as a full-stack developer within an 8-person outsourced team on select external client engagements.
- Built and maintain NestJS APIs with modular architecture, PostgreSQL databases, and role-based access control across all products.

Woobia — Livestock Trading E-Commerce Platform

- Built and maintain a large-scale mobile and web platform for animal trading, now used by 200+ active users.
- Implemented offline-first ordering with automatic sync on reconnect, keeping the platform usable for users with unreliable connectivity during live trading events.
- Built Excel import/export for bulk product uploads (thousands of items per batch) and real-time dashboards for stock, warehouse, and order management.

React, NestJS, Prisma, PostgreSQL

Live: woobia.com

Barbershop Reservation & Management Platform

- Built a booking and business-management platform serving 600+ active users across client, admin, and worker-facing apps.
- Implemented live appointment visibility and real-time updates via WebSockets, plus push notifications for booking events.
- Built a dedicated dashboard for owners to track revenue and individual worker earnings.

React Native, Expo, NestJS, WebSockets, PostgreSQL

App Store: [View on App Store](#)

Internal CRM & Project Management Platform

- Built a CRM covering project tracking, billing, and staff attendance, now sold to external clients in addition to internal use.
- Simplified financial tracking and attendance-based work monitoring for client teams, reducing manual admin overhead.
- Added an AI-assisted chat feature and a dynamic invoice/quotation system with PDF generation and email integration.

React, NestJS, PostgreSQL, TypeScript, WebSockets, AI Integration

Live client example: hb-lawyer.com

Additional Contributions

- **AI Social Media Manager:** AI platform that uses OCR and an LLM-powered ideation module to generate video titles, descriptions, and posting schedules, then cross-posts to YouTube, Facebook, Instagram, and X via OAuth2.
- **University SAML SSO:** Implemented SAML single sign-on and IP-range-based auto-login for campus network authentication.
- **Business Portfolio Platform:** Built an NLP-powered chat assistant for client consultation scheduling.
- **Hotel Photography Desktop App:** Electron app with face detection for automatic photo grouping and invoice generation.

EDUCATION

Engineering Degree, Software Engineering — Polytech INTL

2021 – 2026

TECHNICAL SKILLS

- **Frontend:** React.js, React Native, Next.js, TypeScript, JavaScript, Tailwind CSS
- **Backend:** NestJS, Node.js, Express.js, Prisma, PostgreSQL, MongoDB
- **Cloud & DevOps:** GCP, AWS, Firebase, Docker
- **Mobile:** Expo, Firebase, Push Notifications, OAuth (Google, Facebook, Apple)
- **Other:** REST API, WebSockets, Socket.IO, Excel Import/Export, PDF Generation
